

KANDA.CARE OVERVIEW

KANDA.CARE is a low cost, high impact tablet based MIS for schools, with core data stored on Google Drive allowing any number of tablets to be supported. To keep costs low and to allow maximum customisation, user data analysis and accessibility we use Google Sheets to store data rather than a commercial database. This was not easy to do efficiently but it was worth it, allowing a level of personalisation to school, cluster or trust that is simply not possible with other systems. For the teacher at the sharp end great effort has been taken to create maximum user friendly usability in a small hand held tablet. KANDA.CARE was designed to be USED.

KANDA.CARE consists of several modules, each consisting of a number of elements. While each module can be used independently, a school will see maximum benefit from the cross-module interaction in using the complete suite.
